2018

Entering New Markets adding mesh and bone wax to our products portfolio.

2020

Mgroup (ISMC) Launched its 3<sup>rd</sup> factory in the region in Accra, Ghana.

# Our Vision

---

The vision of our founder Magdi Mobasher is shaped by his desire to make the African population independent in medical tools manufacturing.

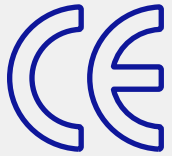

He envisions an era where every African country would be benefitting from MGroup's medical devices.

Mr. Mobasher also hopes to create a solid network of MGroup's agents all across Africa so that people can manufacture the devices locally and help the medical fraternity.

# How do We work

---

At M Group, we are committed to revolutionizing the medical industry of Africa by producing quality medical devices. Our primary aim is to make the premium medical devices accessible to every citizen of Africa, and we can go all out to achieve that.

## **CE**

Our unrivaled ability earned us a name as the leading medical device manufacturer in Africa.

## **Research & Development**

We know the importance of exceptional R&D, which is why, through a combination of knowledge and insights, we develop products that stand the test of time.

## **ISO**

Our unrivaled ability earned us a name as the leading medical device manufacturer in Africa.

## **Premium Quality**

Not compromising on the quality of our equipment is our cornerstone. We only use premium quality material in our products to ensure durability and optimum levels of effectiveness.

## **INNOVATION**

Our manufacturers at MGroup are tech-savvy professionals who leverage the potential of technology and implement new ways of manufacturing high-end medical tools.

## **Trust & Transparency**

Our unrivaled ability earned us a name as the leading medical device manufacturer in Africa.

# POSITIONIING

---

**MGroup** is committed to providing top-notch medical devices to African people in order to minimize the dependency on western countries and improve the quality of treatment for patients. The way Google reinvented the internet world, we have reinvented the medical world. Leveraging years of experience in the medical industry and attention to detail, our manufacturers are seasoned experts and tap into the power of the latest technology to produce high-end devices. With deep roots in the medical manufacturing industry, our experienced team combines knowledge, dedication, and

patented technology in one place, making it easy for people to develop sound health and learn the intricacies of the surgery. Preferring us would mean that you are working with trustworthy producers who have their fingers on the pulse of everything.

In addition to our vast experience, the other aspect that makes us stand out is the unmatched quality of our medical equipment. We never compromise on the quality of devices and adhere to the innovative standards of manufacturing. Our competent professionals have the skills required to research, analyze, and utilize out-of-the-box quality management solutions that deliver high-end products. Most importantly, we sink our teeth deep into the latest technology trends to meet the fast-evolving demands of patients.

# Our Factories

---

## **Cairo, Egypt**

Opened in Cairo in 2002, it was the first place where we introduced our unrivaled expertise in medical manufacturing to the Egyptians. However, the factory has now mushroomed into a leading health supplies manufacturer, thanks to the hard work of Mr. Magdi Mobasher.

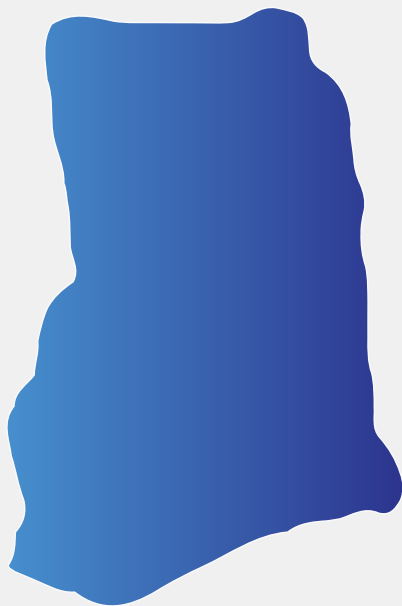

It not only designs sophisticated medical instruments that can meet the rigorous demands of healthcare professionals, but it also disseminates the knowledge that can help the other professionals design the equipment locally.

## **Khartoum, Sudan**

The MGroup entered the Sudanese market in 2012 and took all the health professionals by surprise. Our untraditional approach to manufacturing surgical sutures and our expertise in research and testing revolutionized the entire medical industry of Sudan.

The MGroup has an active presence in Sudan and will continue to help the healthcare industry with highly effective surgical sutures.

## **Accra, Ghana**

Entering the diverse market of Ghana was a dream come true for the founder Magdi Mobasher.

Our state-of-the-art facility was opened in Ghana in 2020 and has been meeting the unique demands of health professionals since then. From manufacturing surgical sutures and sophisticated medical equipment to training the locals about effective manufacturing techniques, the facility is proving remarkably efficient in every sphere.
